EXPERIENCE

Lecturer, **BRAC University**

May 2024 - Present

- Designed Course Materials and Course Outline for **CSE440: Natural Language Processing II - Labs**
- Instructed AI, Numerical Methods, NLP, and Discrete Mathematics to **300+** students per semester
- **Supervised 6** undergrad research groups focusing on **NLP, Machine Learning Bias & Ethics, Reinforcement Learning and AI in Health & Education**
- Designed **Polynomial Interpolation Lab** and **Neural Network Lab**

ML Team Lead, **Innospace Infotech Ltd.**

Nov 2024 - Present

- Consulted with parent company, **Lecture Publications Ltd.** to design automated storage and ETL pipeline for 170k+ educational documents reducing 52% of the costs
- Designed Hierarchical-RAG system based automation solutions for cleaning and curating database
- Designed & Implemented the integration layer for attaching the security focused Multilayer HRAG system
- Built and integrated an OCR-based solution, reducing data extraction time by 92%
- Designed and implemented a Transformer based custom-POS tagger and increased conversion speed by 3x
- Designed a student tracking system improving engagement metrics by 23% for **Britto App**

Data Scientist, **Robi Axiata Ltd.**

Mar 2024 - May 2024

- Integrating Generative AI in the customer and internal-facing interfaces
- Implemented AI pipelines and designed a user-base churn model on 47M users' transnational data (170 TB) for an offer-suggesting hierarchical model

Undergraduate Teaching Assistant, **BRAC University**

Oct 2022 - Dec 2023

- Assisted in conducting laboratory sessions under the guidance of lecturers and professors
- Organized and led study groups to enhance students' understanding and study techniques
- Courses: CSE220 - Data Structures, MAT215 - Mathematics for Machine Learning & Signal Processing, PHY112 - Principles of Physics II

EDUCATION

BRAC University

2020 – 2023

BSc in Computer Science and Engineering

CGPA: 4.00 out of 4.00

Research

destroR: Attacking Transfer Models with Obfuscated Examples to Discard Perplexity [link](#)

Thesis Supervisor: **Dr. Farig Yousuf Sadeque**, Assistant Professor, BRAC University

- First author to the paper under review by the professor
- Pioneered the integration of Bengali language into the realm of Adversarial Attacks and Adversarial Training
- Devised **three** potent **adversarial attack** strategies **tailored for Bengali**, revolutionizing the field
- Demonstrated remarkable success in undermining classification tasks, resulting in a **substantial 18-40% decrease** in the initial F1 Score

SKILLS

- **Programming Languages:** Python, Dart, C, C++, TypeScript, JavaScript, WolframScript
- **MLOps Platforms:** AWS, Docker, Kubernetes, Kuberflow, Amazon Sage Maker, Paper Space
- **Tools:** Scikit-learn, Transformers, TextAttack, nltk, TensorFlow, GraphQL, Flask, Flutter
- **Natural Language Processing:** Langchain, Langflow, TensorFlow, GROQ, MistralAI, ChromaDB, Quadrant
- **Data Integration:** ETL Pipelines, Data Transformation, Database Management

PERSONAL PROJECTS

SemEval 23 Task 10: Explainable Detection of Online Sexism (EDOS)

- Ranked in the top 12 worldwide
- Explored the task with a statistical approach with a Micros F1 Score of 53.47%

BSenti: Bangla Sentiment Classification Python Library

- Generalized the Bangla Sentiment Classification Datasets
- Provided a comparative status of the statistical and deep-learning models

AWARDS & CO-CURRICULAR ACTIVITIES

- 100% merit-based scholarship in BRAC University
- Appeared in the Vice-Chancellor's Award 7 times
- Senior Executive in IT Department, BRAC University Adventure Club
- Lead Software Research Team Member, Robotics and Intelligent Systems (RIS)
- Pursued training in Guitar and Harmonium to explore musical expression
